INTER GROUP offers you the opportunity to create private label files and polishers. By partnering with us, you can increase the visibility of your brand through personalized abrasive products with a selected imprint in color or black and white version. We will create a print design for you to place on your abrasive product or adapt an existing design. Private Label means no restrictions on the choice of file shape, gradation, or color of abrasive paper within the offer. In addition, we offer the possibility to wrap files and polishers in foil, in order to increase the hygiene of the tool (the imprint on the foil can also be personalized).

2000m² - this is the area of our factory in Namysłów. The files and other abrasive articles are manufactured using only European prefabricated products.

150 thousand - this is how many files we produce and sell every day.

150 - in our offer there are more than 150 different variations of the file for (shape, gradation, thickness).

We fulfill private label orders starting from 10000 pieces. For nine years of activity we have served more than 700 wholesale customers. Eliza Trzmiel, co-owner of ABA GROUP NAILS CARE, was awarded the title of Entrepreneur of the Year in a competition organized by EY. We participated in the "New Business" category, where we competed against other Polish businesses.

Files

The halfmoon file provides comfortable work with cuticles, and also makes it easier to shorten the nail or file it. This is the most universal shape of the file, which is also our bestseller. Under our Private Label service we will create for you a print design (color or gray-scale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

The banana file has many fans, mainly due to its multi-functional shape, which, combined with high precision filing, will work well in creating most styles. We recommend it especially when forming oval nails, and its lack of sharp edges increases the safety of work. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Do you like classic solutions? Try our straight-shaped nail file, which is good for working on the natural nail plate. It is an ideal choice for filing square nails, as well as precisely creating a nail design. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

The ellipse file is a tool, without sharp angles, which provides greater safety of work in comparison to other shapes. With our file you can effortlessly shape your nails and level the nail plate. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Are standard file shapes no longer impressing you? Try our wings file! This is an unusual combination of two different tips, which together create a very versatile tool. The wings file is also a recommended choice when working with oval or square nails.

The file in this shape fits very well in the hand, which speeds up work and makes it more efficient. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design. Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Technical data

Print

Best quality ink, does not smear or affect abrasive properties. Free of sensitizers.

Paper

Extremely durable and resistant to abrasion. Coated with special substance to prevent "clogging".

Binder

Non-toxic and dermatologically tested.

Filling

Composite material of exceptional durability and flexibility.

Grey

Abrasive grains are coated with a substance that prevents the product from sticking to the paper. The effectiveness of the file does not decrease during filing.

Sand

The abrasive grains are chipped off during filing, so the file stays sharp during the procedure.

Lilac

Coated with a layer to prevent "clogging" of the abrasive layer. Delicate, safe, yet very precise.

Buffer

Foam with abrasive properties. Ideal for both matting natural nails and smoothing materials such as gel, acrylic or hybrid.

Thickness options

Slim

This is a slimmed down version of the standard nail file. It does not contain synthetic inlet, making the tool about 1 mm thinner.

Standard

Nail file of approximately 4mm thickness. To make the tool fit better in the hand, a synthetic inlet is placed between the layers of paper, which reinforces the file and keeps it from bending.

Gradation variants

80 – is the coarsest gradation of sandpaper available. It is designed for working on acrylic, acrylic-gel and gel.

100 – for working on hard polymers such as gel, acrylic and acrylo-gel.

150 – suitable for filing hard and soft materials, recommended for gels and hybrid varnishes.

180 – recommended gradation for filing hybrid varnish.

240 – designed to work on natural nail plate.

Print options

Black and white print

The best quality ink, which makes the print very detailed and realistic. The print does not smear during filing.

Color print

This is a total novelty on the manicure market. Colorful print on the file catches the buyer's attention, and its quality allows the details to be reproduced well. As well as in the case of black and white designs, it does not wear off in the course of work.

Packaging options

Skin Pack

As part of Private Label, we also offer the option of customizing the Skin Pack. We can design any print pattern on the back that will go well with the file design.

Foil

The packaging allows you to see the file in its entirety, and the sealed foil allows you to touch the texture of the abrasive.
