About us

INTER GROUP offers you the opportunity to create private label files and polishers. By partnering with us, you can increase the visibility of your brand through personalized abrasive products with a selected imprint in color or black and white version. We will create a print design for you to place on your abrasive product or adapt an existing design. Private Label means no restrictions on the choice of file shape, gradation, or color of abrasive paper within the offer. In addition, we offer the possibility to wrap files and polishers in foil, in order to increase the hygiene of the tool (the imprint on the foil can also be personalized).

+150 000	produce nail files per day

Files

The halfmoon file provides comfortable work with cuticles, and also makes it easier to shorten the nail or file it. This is the most universal shape of the file, which is also our bestseller. Under our Private Label service we will create for you a print design (color or gray-scale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Banana

The banana file has many fans, mainly due to its multifunctional shape, which, combined with high precision filing, will work well in creating most styles. We recommend it especially when forming oval nails, and its lack of sharp edges increases the safety of work. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Do you like classic solutions? Try our straight-shaped nail file, which is good for working on the natural nail plate. It is an ideal choice for filing square nails, as well as precisely creating a nail design. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Elipse

The ellipse file is a tool, without sharp angles, which provides greater safety of work in comparison to other shapes. With our file you can effortlessly shape your nails and level the nail plate. Under our PrivateLabel service we will create for you a print design (color or grayscale), which will be placed on Your abrasive product, or we will adapt an already existing design.

Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. Are standard file shapes no longer impressing you? Try our wings file! This is an unusual combination of two different tips, which together create a very versatile tool. The wings file is also a recommended choice when working with oval or square nails.

The file in this shape fits very well in the hand, which speeds up work and makes it more efficient. Under our Private Label service we will create for you a print design (color or grayscale), which will be placed on your abrasive product, or we will adapt an already existing design. Private Label means that you are not limited in your choice of file shape, gradation or color of abrasive paper within our offer. In addition, we also offer the option to pack the files and polishers in foil, in order to increase the hygiene of the tool (the print on the foil can also be personalized).

Polisher

The polisher is an ideal tool for quickly matting and smoothing the nail plate. It will prove useful for working on a natural plate, but also for polishing unevenness after the application of gel or acrylic products. Available in three variants: standard, mini, and polisher block.

Tear-off buffer „Flowers” is the perfect solution for professional nail stylists who use several or even a dozen polishers every day. A handy block of 15 small polishers will be perfect for salon work, when we need to have all the tools near us. As with files, polishers should be disposable for hygienic reasons. The „Flowers” polisher will smooth the surface of the nail. Available in two gradations: 100/180 and 180/240.

A total innovation! Miniature polishers in 100/180 grade, packaged in packs of 20. Their fine size will allow for precise matting of the nail plate and smoothing the unevenness created when applying gel or acrylic mass.

Dual

DUAL is a unique combination of a nail file and polish-er. From now you do not have to swap tools, instead use a two-in-one option.

25pcs set of abrasive pads with 100 grit, which can be easily attached to the metal base of the file. They do not slip or move during work, and additionally adhere firmly to the base. Gradation of 100 is ideal for shortening nails extended with the gel method. It will also be suitable for thickened toenails. The abrasive pads are disposable and should be thrown away after finishing work.

Usage:

Tear off the protective paper from the overlay, fix it with glue on a dry and clean file handle. After finishing the treatment, peel off and throw away the abrasive pad. Remove adhesive residue with an acetone-based liquid.

Metal foot grater

Aba Group metal foot grater carrier. Suitable for both dry and wet work. It has a sturdy handle made of stainless steel. For the grater we use self-adhesive and disposable abrasive pads with different grades of coating. Properly shaped handle will provide the highest comfort of work.

The product has one disposable grinding pad. Designed specifically for the carrier of a metal pedicure grater. Waterproof paper and strong glue guarantee high working comfort. The self-adhesive pad will not peel off, and will not move during operation. Grain grade provides quick removal of tough keratinized skin.

Technical data

Print

Best quality ink, does not smear or affect abrasive properties. Free of sensitizers.

Paper

Extremely durable and resistant to abrasion. Coated with special substance to prevent "clogging".

Binder

Non-toxic and dermatologically tested.

Filling

Composite material of exceptional durability and flexibility.

Abrasive

Grey

Abrasive grains are coated with a substance that prevents the product from sticking to the paper. The effectiveness of the file does not decrease during filing.

Sand

The abrasive grains are chipped off during filing, so the file stays sharp during the procedure.

Lilac

Coated with a layer to prevent "clogging" of the abrasive layer. Delicate, safe, yet very precise.

Buffer

Foam with abrasive properties. Ideal for both matting natural nails and smoothing materials such as gel, acrylic or hybrid.

Thickness options

Slim

This is a slimmed down version of the standard nail file. It does not contain synthetic inlet, making the tool about 1 mm thinner.

Standard

Nail file of approximately 4 mm thickness. To make the tool fit better in the hand, a synthetic inlet is placed between the layers of paper, which reinforces the file and keeps it from bending.

Gradation variants

80 – is the coarsest gradation of sand paper available. It is designed for working on acrylic, acrylic-gel and gel.

100 – for working on hard polymers such as gel, acrylic and acrylo-gel.

150 – suitable for filing hard and soft materials, recommended for gels and hybrid polishes.

180 – recommended gradation for filing hybrid polish.

240 – designed to work on natural nail plate.

Print options

Black and white print

The best quality ink, which makes the print very detailed and realistic. The print does not smear during filing.

Color print

This is a total novelty on the manicure market. Colorful print on the file catches the buyer's attention, and its quality allows the details to be reproduced well. As well as in the case of black and white designs, it does not wear off in the course of work.

Packaging options

Cardboard

Cardboard packaging is a more environmentally friendly alternative to plastic packaging. This type allows more printing personalisation options.

Skin Pack

As part of Private Label, we also offer the option of customizing the Skin Pack. We can design any print pattern on the back that will go well with the file design.

Foil

The packaging allows you to see the file in its entirety, and the sealed foil allows you to touch the texture of the abrasive.
