

INTER
GROUP

INTER GROUP has been in the cosmetics market since 2014. Our main business is the manufacture of files and other abrasive products at our own factory in Namysłów. As a company, we promote the use of disposable cosmetic tools - including nail files - to raise hygiene standards in beauty salons. Several brands operate under the leadership of INTER GROUP - MANI KING, ABA GROUP, ELDA BEAUTY, INTERB2B, as well as a file factory.

Eliza Trzmiel, the co-owner of INTER GROUP, has been awarded a prize in the prestigious Entrepreneur of the Year competition organized by EY. We took part in the "New Business" category, where we competed against other Polish companies.

ABOUT US.

NAIL FILE.

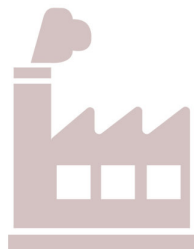

We specialize in the production of files, polishers and other abrasive articles. In our offer you will find more than 150 versions of files, which have different shapes, gradings and designs.

The nail file factory has been in operation since 2015, and in the course of our operation we have obtained many certificates, including the European quality leader, the European guarantee of the highest quality, and the European safety certificate.

ISO 22716

2000m²

Production space in Poland.

13

Number of countries in the world where we deliver our orders. We have delivered our files to France, the Netherlands, Austria and Germany, among others.

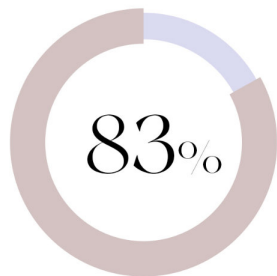

+700

wholesale customer

150 thousand

That's how much we produce and sell every day. All products are made in our factory in Namysłów.

According to the PMR survey, 83% of Poles buy cosmetics in stationary drugstores, while 37% of consumers choose online stores. Among the products that customers are looking for are nail files, thus stationary drugstores are a big market when it comes to selling abrasive products.

6,6million

is the number of visits booked on the Booksy platform. Of which, Polish women are most likely to make appointments for hybrid manicures (20% of all bookings), haircuts (15%) and nail extensions (8%). That gives us about 1.32 million customers interested in a hybrid manicure service and about half a million looking for nail extension options. For both of these services, a nail file is an essential tool. This is just one part of the beauty market where a nail file is an essential tool.

Do you know that...

print

Best quality ink, does not smear or adversely affect productivity. Free of sensitizers.

paper

Extremely durable and resistant to abrasion. Coated with dust to prevent "clogging".

binder

Non-toxic and dermatologically tested.

filling

Plastic with exceptional strength.

safety

The files have no irritant or sensitizing properties. It has been laboratory tested and confirmed by a dermatological report. All our abrasive products bear the CE mark, which means that they meet all the requirements of EU directives and have undergone the appropriate conformity assessment procedures, ending with a positive result.

COMPOSITION.

SHAPE.

We offer all of the most popular file shapes, but we are able to create a file completely from scratch to fit your needs.

slim

standard

THICKNESS.

Each shape comes in two thickness variants - SLIM/STANDARD. The standard version between the abrasive and foam also contains plastic, which the slim version does not have. The slim file, due to its slim design, is more accurate when filing edges. In terms of comfort, the standard option definitely fits more securely in the hand.

Grey

The dust is coated with a substance that prevents the product from sticking to the paper. The performance of the file does not decrease during filing.

Sand

The abrasive particles are chipped off during filing, so the file stays consistently sharp throughout the procedure.

Lilac

Covered with a layer that prevents "clogging" by the abrasive. Delicate, safe yet precise and accurate.

Buffer

Foam with abrasive properties. Ideal for both matting natural nails and smoothing material such as gel, acrylic, hybrid.

ABRASIVE.

We provide a wide selection of constantly available, tested and selected abrasive papers.

PRINT.

Unlimited printing possibilities without loss of quality.

PACKAGE.

Skin pack

Foil

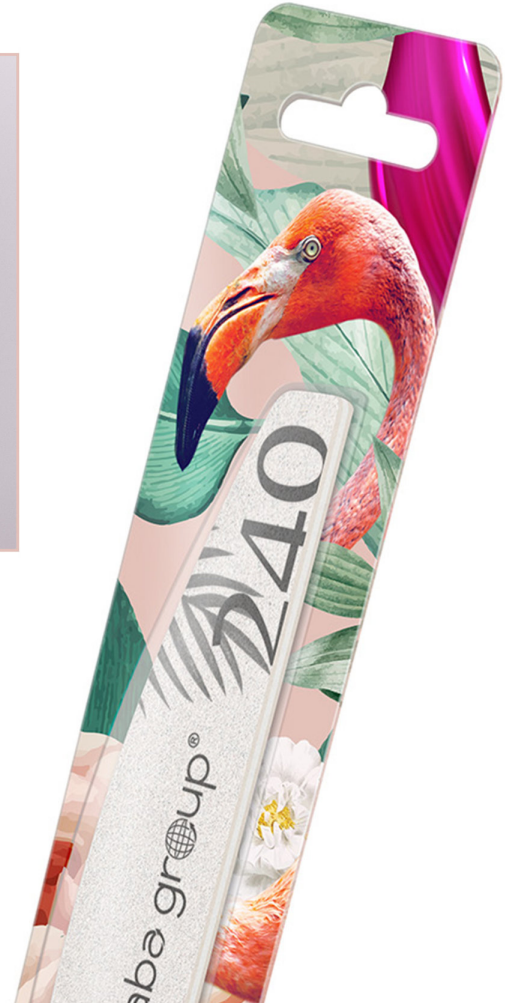

Cardboard box

PACKAGE.

The file is packed in a skin pack (back - cardboard, front - foil). The packaging allows you to see the file in its entirety, and the sealed film allows you to touch the texture of the abrasive.

SKIN PACK.

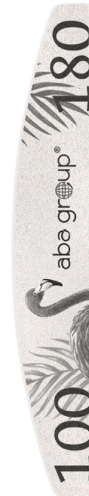

The file is packaged in a transparent foil. Such packaging gives you the opportunity to see the product in its entirety and check the thickness and texture of the abrasive.

FOIL.

FOIL.

It is possible to personalize the imprint on foil.

The file is packaged in a cardboard box that fits the tool perfectly. The cardboard box is durable, making it a reusable package. This makes it suitable, for example, for trips or for carrying around in a handbag every day.

CARDBOARD BOX.

mini skin pack

mini cardboard box

big cardboard box

The mini file in a cardboard box is a compact version of our standard file. The miniature file is great for traveling or carrying in your purse. Despite its small size, its abrasive properties remain the same as with larger models. The universal grading of 100 by 180 can be used for hybrid, gel, acrylic and acrylic-gel styling. It will work perfectly for filing the natural nail plate.

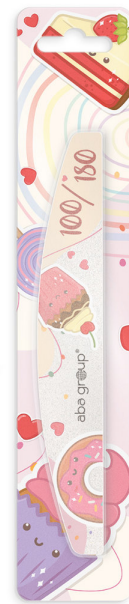

COMPACT.

All in one place! The convenient ALLY-OUNEED package consists of a 100/180 file, mini polisher and cuticle repelling stick in a compact package. Such a kit is the basis of any manicure, so it is worth having it with you at all times.

All you need.

SKIN PACK.

It is possible to personalize the imprint on the packaging and the file as well as choose any shape of the file.

DUAL.

DUAL is a unique combination of a file and a polisher. Now you don't need to change tools during work with our the two-in-one DUAL.
